NightLife

Every Thursday night from 6:00PM to 10:00PM

Here's your opportunity to experience a whole new side of the Academy at NightLife. See it transform into a lively venue filled with music and mingling, provocative science, special activities and cocktails to create a uniquely sophisticated evening for visitors ages 21 and over. Food and cocktails are available for purchase throughout NightLife — cash only. Valid Photo ID required prior to entering the event. Retail Price: \$15 per person

Now Showing

EXPLORE COLOR OF LIFE

Now Open

There's more to color than meets the eye. The California Academy of Sciences' new exhibit *Color of Life* explores the connection between charismatic colors and their starring role in the natural world. Explore an eye-popping array of organisms—from jewel-toned insects and birds with dazzling plumage, to multi-hued reptiles and amphibians—and discover how scientists use the diversity of life's colors to understand and illustrate the interconnectedness of life on Earth. Cutting-edge interactives allow visitors to immerse themselves in a symphony of color and view the world through the eyes of an animal, visualizing how color communicates, attracts, and camouflages within and between species.

New Exhibit

3D EARTH: RAINFORESTS

Opens February 5, 2016

Explore the rainforests of the world like never before with an all-new live 3D show that transports viewers from the lush forest floor to the towering canopies—and beyond.

INCOMING! ASTEROIDS, COMETS, AND THE HARD-HITTING STORIES OF OUR COSMIC ORIGINS

A new planetarium show opens March 11, 2016

Asteroids and comets have collided with our planet throughout its history, changing the course of life on Earth and shaping the world we know today. *Incoming!*, the latest original planetarium show from the California Academy of Sciences, explores the past, present, and future of our Solar System and the landmark discoveries scientists have made sending spacecraft to visit tiny worlds.

TWILIGHT ZONE: DEEP REEFS REVEALED

Opens June 10, 2016

Step inside a realm known as the twilight zone—a narrow, dimly lit band of the world's oceans more mysterious to scientists than the surface of the Moon. In this groundbreaking new aquarium exhibit, located within the California Academy of Sciences' newly updated Coral Reefs of the World gallery, discover the beauty and importance of the little-known reefs that exist between 200 and 500 feet below the ocean's surface—beyond the range of traditional SCUBA gear but above the depths typically explored by submersibles.
